

Welcome to the digital portal

Pensioenfonds Robeco

1

Switch to digital

Our new digital portal is ready, which means our communication can now be completely digital.

Are you ready to switch? We would really appreciate it! Being paperless is not only better for the environment, it saves money through less postage. Furthermore, the digital portal will be the meeting point for all correspondence, which you will find clearly in one place.

The new digital portal is the key to your future. You can instantly view the financial consequences of different scenarios such as retiring earlier, working less hours, occupational disability or marriage.

What does switching to digital mean?

The switch to digital means that you will no longer receive your personal information by post. Instead, it will be available on your digital portal. You will automatically receive a notification via e-mail once you have entered it in the portal.

You can log in to the portal via the website using your DigiD.

Win a gift voucher

If you log in and save your email address you will be automatically entered into a raffle to win one of multiple gift vouchers. So be quick! We hope this promotion makes everyone switch to digital as soon as possible.

Do you object to this change?

Would you prefer to keep receiving your information via the post? Then please inform us **within 4 weeks** by sending an e-mail to robecopensioen@achmea.nl or sending a letter by post.

2

Indexation

Indexation means your accrued pension rights (partly) grow with inflation. This is only possible if the level of funding in a pension fund is high enough, which is now the case. This is the reason we can increase your pension entitlements by 1,7%.

3

Changes to the pension scheme

As of 1st January 2019, several changes have been made to the pension scheme. More information can be found in the digital newsletter or on our website.
